

European WEEE Regulation 2012/19/EU

Collection and Recycling Arrangements in Sweden

Under the Sweden Regulation on Producer Responsibility for Electrical and Electronic Equipment, which implements regulations for Waste Electrical and Electronic Equipment (WEEE) in Sweden, that came into force on August 13th 2005, Pall provides arrangements for the collection, treatment, recycling and recovery of any electric and electronic equipment bought new from Pall when, at the end of its life, that equipment finally becomes waste. Waste electrical or electronic equipment of this type is referred to as WEEE.

Pall drives for very competitive pricing on all our products. Therefore, when these WEEE requirements were introduced, instead of increasing the prices of our products, Pall decided to share these environmental costs with our customers. Because Pall believes in being transparent with you, please be aware that our approach to these environmental costs is:

- Pall pays for the costs of treatment, recycling and recovery of the WEEE to meet the requirements set by the WEEE legislation.
- Pall pays for the costs of data management and reporting to the relevant country specific Agency, to demonstrate compliance with all administrative requirements of the WEEE legislation.
- The user pays for transportation of their WEEE to Pall's appointed recycler in Sweden.

Pall has a recycling contract with a European Advanced Recycling Network (EARN) recycler in Sweden and will cover any costs of treatment, recycling and recovery of the equipment on arrival at the designated recycling facility in Sweden.

WEEE that arises from the purchase of Pall devices is classed as non-hazardous waste based on the materials of construction employed by Pall in its manufacture – unless otherwise indicated on the product label. However, if as the result of use the equipment has been contaminated with a "hazardous" substance, please dispose of the equipment in line with the hazard present.

As indicated, it is your responsibility to arrange and pay for the costs of collection and transportation to the recycling facility.

To request collection and transport of large amounts of WEEE, please use the following link:
